Confirmation

Dear Mrs. Wessels,

with this we confirm, that regular cured coatings with

PE/EP MIXPOWDER art.-no. 531-colour shade

corresponds to the recommendation of the XL of the federal public health office concerning the physical judgement for paints and coatings for food containers and packages. They are suitable for this field of application.

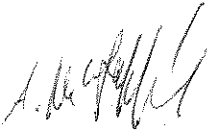

They are physiological harmless. The mentioned product contains no harmful substance like lead, cadmium etc.

We hope, all your questions are answered. For further questions do not hesitate to contact us.

Best regards

RELIUS COATINGS GmbH & Co. KG
